

mCORE to Provide Cardiac Screening Opportunity for Worthington Kilbourne High School

PREVENTATIVE HEART SCREENINGS

I wanted to make you aware of an opportunity that's been made available to our athletes at Worthington Kilbourne High School through mCORE™ — Mobile Cardiac Overview and Risk Evaluation — to provide an optional screening to athletes for the cardiac conditions and abnormalities which may put them at risk of Sudden Cardiac Arrest (SCA).

SCA is the result of unsuspecting cardiological disease or abnormalities which cause the heart to stop without warning or symptoms. We hear about several student-athletes each year that are lost to this devastating tragedy, many of which could have been prevented with a simple examination like this.

The time requirement is approximately 10-12 minutes per athlete. Each athlete will be given an EKG and Echo screening.

(The screening age range is 12-22 years). You may use your Healthcare Spending Account or Flex Care Spending Account. All screenings are performed by a Registered Diagnostic Cardiac Sonographer and results are read by the mCORE pediatric cardiologist.

(Please contact mCORE should financial hardship preclude you from taking part).
